WEBSITE BRIEF

Hopenskin.com

The kind of Shopify store we want built: homepage and product page

Prepared by Digital Tushar Joshi

THE BRIEF

What we need from you

1

A Shopify store

Built on Shopify, so we can manage products, offers and content ourselves.

2

Premium and trust-led

A dark, polished look where the product, the people and the proof are clear at a glance.

3

Built around the reference pages

The next slides show the style we want, page by page. We are sharing the idea, not asking for a copy.

REFERENCE WEBSITES

More inspiration

Please browse these two live stores for more ideas on layout, sections and feel. Use them as a guide, not as something to copy.
